Water is precious. Bengaluru is facing a water shortage, and we must save every drop. Use water only as required and close taps immediately after use. If you notice any water leakage anywhere on campus, please report it immediately to your class teacher. If you find taps left open or leaking in laboratories or washrooms, you have a responsibility to close them to prevent wastage of water.

Water Conservation Alert

As we enter the summer season, it is crucial that we address a pressing issue that affects not only our campus, residences, and hostels but also the larger city in which we reside.

Our city is currently facing a severe water shortage. Groundwater levels have receded significantly, leaving us in a precarious situation. With the onset of summer, the demand for water is increasing.

As members of the academic community, we need to be responsible stewards of our resources, especially in times of crisis. Therefore, I urge each and every one of you to prioritize water conservation in all aspects of your daily lives.

Simple, impactful steps we can take to conserve water:

- Be mindful of water usage in the washrooms and cafeteria of our campus, as well as in your homes and hostels.
- Report any instances of water wastage and ensure that any leaks or drips in faucets and pipes are fixed promptly.
- Encourage friends and neighbours to adopt water-saving habits.
- Reuse water whenever possible, such as collecting rainwater for gardening or using leftover water from cooking for plants.
- Water plants during the cooler parts of the day to minimize evaporation.

By collectively embracing these practices, we can make a tangible difference in conserving water and alleviate the strain on the water resources of our locality.

Let us demonstrate our commitment to sustainability and responsible citizenship through our actions.

Water Management Campaign

Jayantian Extension Services and Center for Social Activities are organising a Water Management Campaign.

As members of this vibrant college community, we have a shared responsibility to care for our environment and conserve precious resources. Water, in particular, is a vital yet finite resource that requires careful management. With this in mind, it's crucial that we come together to implement sustainable water practices within our campus. By making small changes in our daily routines, we can make a significant impact on water conservation efforts.

Changing our behaviours and habits is key to achieving meaningful water conservation. Encourage everyone to adopt simple yet effective practices, such as turning off faucets when not in use, taking shorter showers, and reporting any leaks or wastage promptly. Promote the use of reusable water bottles and discourage single-use plastics, which contribute to water pollution. Emphasize the importance of using water responsibly in recreational activities such as sports events and campus festivities.

Our college campus is not only a place of learning but also a green oasis amid urban surroundings. Let's ensure that our landscaping practices align with sustainable water management principles. Choose native plants that require less water and maintenance, and implement efficient irrigation techniques such as drip irrigation and mulching. Encourage the use of organic fertilizers and natural pest control methods to minimize water pollution from runoff.

As Jayantians, we have the power to drive positive change and set an example for future generations. By embracing a culture of water stewardship within our college campus, we not only reduce our environmental footprint but also inspire others to do the same. Let's commit ourselves to promoting responsible water management practices and creating a sustainable future for our campus and beyond

Together, we can make a difference.
